

3-Ways Wiring Diagrams

SW2500RF & DM2500RF

Web programmable switch and dimmer

sinopé

SW2500RF

Web programmable switch

Technical specifications

Operating voltage: 120 Vac, 60 Hz

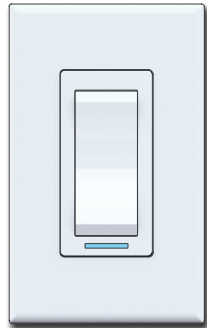

Maximum load:

450 W: LED, CFL, Halogen

960 W: Incandescent

1800 W: Résistif

1/2 HP: Ceiling fan

DM2500RF

Web programmable dimmer

Technical specifications

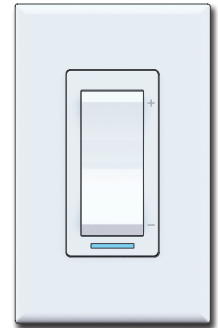

Operating voltage: 120 Vac, 60 Hz

Maximum load:

150 W: LED, CFL, Halogen

600 W: Incandescent

600 W: Halogen

Note : Refer to the installation guide for the dimmer's maximum load in a grouping installation.

Warnings

The installation of this light switch should be made by a certified electrician and must be installed in conformity with the national and local Electrical Codes.

Diagram selection

Locate in your installation where the line wire comes in and where the load wire comes out.

Select from the following options, the diagram that represents the most your installation. Then, refer to the installation guide to find how to link your switch or dimmer to the GT125 Web interface.
