

Senior Back-End Web Developer

Be part of the change. Join Sinopé.

Sinopé Technologies conceives the smart house of tomorrow. A house that communicates, evolves and responds to consumers' needs by offering them a unique environment in which they can control all their connected devices. The Sinopé house goes beyond simple compatibility. Its platforms and products are made for each other and offer exceptional performance.

We design smart thermostats for the widest variety of heating systems as well as lighting, specialized control and water damage protection solutions. Several other products are in development. We also create platforms and smart devices for various renowned companies in North America. You probably already use products of Sinopé Technologies without even knowing it.

Want to join a dynamic team in a stimulating environment? Apply now for a job in R&D > rh@sinopetech.com

Why should you join us:

We design top quality devices for luxury home automation systems as well as for your neighbor who equips his home one room at a time. Our products are designed to give the most complete control at the best price. Our secret? We are a vertically integrated manufacturer - our supply chain is highly efficient and almost everything is designed in-house. From design to engineering to programming, we offer a product proudly made in Quebec.
