

Project Manager – Electronic Product Development

Be part of the change. Join Sinopé.

Sinopé Technologies conceives the smart house of tomorrow. A house that communicates, evolves and responds to consumers' needs by offering them a unique environment in which they can control all their connected devices. The Sinopé house goes beyond the simple compatibility. Its platforms and products are made for each other and offer exceptional performance.

We design smart thermostats for the widest variety of heating systems as well as lighting, specialized control and water damage protection solutions. Several other products are in development. We also create platforms and smart devices for various renowned companies in North America. You probably already use products of Sinopé Technologies without even knowing it.

Want to join a dynamic team in a stimulating environment? Apply now for a job in R&D > rh@sinopetech.com

Why should you join us:

We design top quality devices for luxury home automation systems as well as for your neighbor who equips his home one room at a time. Our products are designed to give the most complete control at the best price. Our secret? We are a vertically integrated manufacturer - our supply chain is highly efficient and almost everything is designed in-house. From design to engineering to programming, we offer a product proudly made in Quebec.

What we're looking for:

Leadership, autonomy and initiative. The selected candidate will work with a multidisciplinary team to direct, guide and oversee the design process of smart devices and management platforms.

Your responsibilities:

- Collaborate with the multidisciplinary team of engineers, technicians and industrial designers in the management of projects;
- Support the rapid growth of both the product and the company portfolios;
- Identify, create or adapt solutions and technologies for different customers in collaboration with the sales and marketing teams;
- Plan, organize and coordinate the work of the relevant team;
- Define work methods;
- Ensure a close and efficient follow-up of certifications and audits;

- Reviewing electrical schematics;
- Participate in the writing of procedures and documentation.

Essential skills:

- Strong, positive, results-oriented leadership;
- Proven oral and written communication skills;
- Team spirit;
- Increased sense of responsibility;
- Thoroughness;
- Versatility.

Qualifications:

- DEC in electronics or Bachelor's degree in electrical engineering;
- 3 years experience in project management;
- French & English.

Assets:

- Knowledge of the Agile method.

What we offer:

- A dynamic and fast-paced environment where decisions are made efficiently;
- The opportunity to work with a multidisciplinary team;
- The opportunity to evolve in a high-growth market in a stimulating environment.

Other benefits:

- Various activities and surprises organized every month;
- Young and dynamic team, friendly environment;
- Quality of life: a healthy and stimulating work environment focused on work-family balance and the well-being of employees;
- Group insurances;
- Registered Retirement Savings Plan (RRSP) Employer Matching Program (RRSP);
- Training and professional development.

Starting date: as soon as possible

Full-time position: 37.5h/week
